

1. **Display All Manga:** The system will fetch and display a list of all manga titles from the database on the homepage, showing at least the cover image and title for each.
2. **View Manga Details:** When a user clicks on a manga from the list, the system will display a dedicated page with detailed information about that specific manga (e.g., synopsis, author, artist, status, and genres).
3. **Search Manga by Title:** The system will provide a search bar that allows any user to input text and see a list of manga titles that match the search query.
4. **Submit a Numerical Rating:** An authenticated user can submit a score (e.g., on a scale of 1-10) for a specific manga on its detail page.
5. **Display Average Rating:** The system will automatically calculate the average score for each manga based on all user ratings and display this average on the manga's detail page.
6. **Write a Text Review:** An authenticated user can write and submit a text-based review for a specific manga.
7. **View All Reviews for a Manga:** The system will display all submitted user reviews on the corresponding manga's detail page for others to read.
8. **Add Manga to a Personal List:** An authenticated user can add a manga to a personal list with a specific status (e.g., "Reading," "Completed," "Plan to Read").
9. **View Personal Manga List:** The system will allow a user to view their own profile page, which will display the manga they have added to their personal lists.
10. **Admin: Add New Manga:** The system will have a protected route/page where an administrator can access a form to add a new manga title and its details to the database.
